Thursday April 1st, 2010

Today was a SS day. All but TF made new highs, before starting the SS day decline. The strong bounce at the end created a bit of confusion for Monday.

Monday should be a Buy day. The current decline is pretty shallow, so we should expect a decline on Monday.

Friday April 2nd, 2010

Although there was no trading during the day session, we did get some during the Globex session. Normally we should not have gotten any trading, however since the NFP report was coming out this morning they kept the Globex open, therefore I am adding today to the book.

This makes Monday a Sell day now.

This is an unusual situation due to NFP on a holiday. Therefore I am doing this under reserve at the moment, and may have to correct this Monday night.

So far today did react as a Sell day more than a Buy day, therefore adding yesterday was probably the right move.

Based on that tomorrow will be a SS day.

Tuesday April 6th, 2010

Today was a SS day. The rally continued and for some reached the maximum average 3 day average.

Tomorrow will be a Buy day. We should expect a decline on a Buy day, however was the last minute drop the start of the decline or will the momentum make us test the highs before the decline starts.

Wednesday April 7th ,2010

Today was a Buy day. The last few cycles have been confusing buy days with the fake low made first and then a new low made near the end of day.

Tomorrow will be a Sell day and could prove to be more of a confusing day based on where we closed today.

Today was a Sell day. Looked confusing at the start but ended up being a nice Sell day. We tested the BDL and rallied strongly from there to nearly the BD highs.

Tomorrow will be a SS day. We still have some room to go up based on the average 3 day rally.

Monday April 12th, 2010

Today was a Buy day with a shallow decline which is bullish, however markets didn't go too far up. Tomorrow will be a Sell day. We should anticipate a rally on Sell days but the bullishness of today's move was not very convincing. We may need to be careful on this Sell day

Wednesday April 14th, 2010

Today was a SS day and as I mentioned last night, we had room to run up and we surely did just that all the way to the maximum TTT

Tomorrow will be a Buy day. Momentum could take us higher before the decline starts. Also remember that the bulls are in control so it is very possible that we will get a shallow decline.

Monday April 19th, 2010

Today was a SS day and as I expected on Friday, most indices failed to get a 3 day rally. Having said that they all gave it a try at the end of the day.

Tomorrow will be a Buy day. The end of day momentum could take us a bit higher before the decline starts.

Tuesday April 20th, 2010

Today was a Buy day. The decline was shallow sending mix signals, following the 3 day rally failure. Tomorrow will be a Sell day. Based on the above comment I would expect a confusing day.

Tomorrow will be a SS day. Only TF made new high, so unless the others wake up and join the TF flow, we could get a nice SS day.

Thursday April 22th, 2010

Today was a SS day. Looking at the open today I was expecting a failed 3 day rally. Well TTT statistics proved to be right.

Tomorrow will be a Buy day. The momentum may take it a bit higher before the decline starts.

Wednesday April 28th ,2010

Today was a Buy day. They took today to digest the big drop of yesterday, since we had reached the decline averages, and made today look like a Sell day.

Tomorrow will be a Sell day. Today's confusion should be enough and we should get some rally.

Today was a Sell day. So far bulls could not hold on to the gains of yesterday, TVGR did set in today and took the markets lower.

Tomorrow will be a SS day. We are below the Buy day lows, therefore if the bulls want to keep control they will have to get back above the BDL, and TTT odds favor that.

Wednesday May 12th, 2010

Today was a Sell day and was less confusing than expected, as TVGR was in effect all day.

Tomorrow will be a SS day. We have an average 3 day rally in place at the moment, the morning gap may dictate the direction tomorrow.

Today was a Buy day. The decline did continue to the TTT MA violation levels before the rally started. Tomorrow will be a Sell day. Half the average rally is in place, therefore we could get a confusing day.

Friday May 21st, 2010

Today was a SS day. As expected, we did get a failed 3 day rally. Markets did try to rally back to the BDL but there was just too much ground to cover.

Monday will be a Buy day. Having closed near the highs for the day, we may go higher before the decline starts.

Tuesday May 25th, 2010

Today was a Sell day and even after this large opening gap down, markets were able to get back to the BDL, I must admit that I never thought it would, but the TTT odds did favor that scenario.

Tomorrow will be a SS day. At this point the 24 hour markets have a minimal positive 3 day rally, momentum should get the day session to produce at least a small one.

Wednesday May 26th, 2010

Today was a SS day and markets did perform as a SS day should, by violating the Sell day high before reversing.

Tomorrow will be a Buy day. The decline is already in place, the question is will momentum take us lower before the rally starts.

Thursday May 27th, 2010

Today was a Buy day. Yesterday's momentum did help in producing a shallow decline.

Tomorrow will be a Sell day. Now most of the rally is in place, therefore creating the possibility of a confusing day.

Tuesday June 1st, 2010

Today was a Buy day. The decline looked done early and even overnight, however markets decided to go lower at the end of the day.

Tomorrow will be a Sell day. Momentum may take us lower before the rally can start.

Wednesday June 2nd, 2010

Today was a Sell day. After testing the lows all 4 instruments rallied. ES and YM even had TVGR.

Tomorrow will be a SS day. At this point all 4 instruments closed on the highs and right at the average 3 day rally levels. Momentum may take us higher before the decline starts.

Friday June 4th, 2010

Today was a Buy day. Markets tested the SS day highs during the overnight session and failed to go higher, and therefore started the decline early. TVGR did help amplify the move down.

Monday will be a Sell day. Momentum may take us lower before the rally can start.

Monday June 7th, 2010

Today was a confusing Sell day to start but finished with a good selloff.

Tomorrow will be a SS day. Averages would say that they will try to at least get back to the Buy Day Low.

However the Bearish mood of the markets may cause a failure.

Tuesday June 8th, 2010

Today was SS day. ES and YM made it back to the Buy day low, but not the others.

Tomorrow will be a Buy day. Will the others make it back to their old BDL before the decline start, that is the question.

Thursday June 10th, 2010

Today was a Sell day and being Rollover day didn't help the confusion. But we still got our rally.

Tomorrow will be a SS day. At this point Markets are at the Positive 3 day levels. Will the momentum take us higher before the decline starts??? That is the question.

Monday June 14th, 2010

Today was a Buy day. Except for TF all the others made a small decline and as the case for last few Buy days the decline was made at the end of the day.

Tomorrow will be a Sell day. Small declines are bullish in principle, however since TF didn't get any we may go lower before the rally starts.

Monday June 21st, 2010

Today was a perfect SS day with markets reaching TTT levels before starting their declines which reached the average decline required for a buy day before bouncing a bit.

Tomorrow will be a Buy day and as I just said we are close to the average decline levels.

Wednesday June 23rd, 2010

Today was a Sell day and yesterday's momentum did take the markets lower before the rally started. Tomorrow will be a SS day. There is still plenty of room to continue this rally, however the bears seem to be in control this week.

Thursday June 24th, 2010

Today was a SS day. Markets tried to test the Highs of the Sell day and failed to go higher and therefore the decline started.

Tomorrow will be a Buy day. Based on today's action and the fact that we still have room to go lower, the decline should continue.

Monday June 28th, 2010

Today was a Sell day. Markets reacted in a confused way.

Tomorrow will be a SS day. There is plenty of room for a rally, as so far today didn't do much.

Tuesday June 29th, 2010

Today was a SS day and most had a Day session failed 3 day rally again. Two in a row is rare and not bullish for sure.

Tomorrow will be a Buy day. Based on averages the objective for some have been met so far. However having closed near the lows, momentum could take us lower.

Friday July 2nd, 2010

Today was a SS day. Markets managed to get a 3 day rally but not a very weak one.

Monday will be a Buy day. However it will be a shorten day so it is hard to say what may happen.

Today was a Sell day and the sell objectives were reached before the markets started a correction.

Tomorrow will be a SS day. At this point TF is the only one below the Buy day low. It will be interesting to see if the others will make another leg up in order for TF to get back to the BDL.

Monday July 12th, 2010

Today was a SS day and markets did get higher with the momentum and started their decline only to get back up to the highs again.

Tomorrow will be a Buy day. The last minute momentum may take us a bit higher before the decline starts.

Thursday July 15th, 2010

Today was a SS day. The bulls were not overly committed and made their highs during the Globex session. Tomorrow will be a Buy day. The up down motion of today may make for a confusing Buy day with a possible shallow decline.

Today was a Sell day. Markets were confused until the US Day session started at which point the rally continued and achieved the targets.

Tomorrow will be a SS day. There is room to continue the rally and having closed on the highs of the day momentum should help

Thursday August 12th, 2010

Today was a Sell day. Momentum did carry the markets lower and reached the TTT violation levels before rebounding to the Buy Day Low.

Tomorrow will be a SS day. We are still below the Buy day low, therefore odds favor that we should rally a bit to at least the BDL

Friday August 13th, 2010

Today was a SS day. All 4 markets made a Positive 3 Day rally on the 24 hour Globex session, however failed on the day session. It is not for the lack of trying as ES came within 1 tick of getting there.

Monday will be a Buy day. Based on today's close and the fact that the average decline is not over, we should continue with the decline.

We did get an Hindenburg Omen yesterday which is not confirmed yet, and having a failed 3 day rally don't help the Bullish scenario. In Bear markets TTT favors stronger Declines and weaker Rallies.

Today was a Buy day. The average decline occurred at the open and the markets rallied afterwards. Tomorrow will be a Sell day. Having accomplished a good part of the rally today we will probably get a confusing day.

Today was a Sell day. Markets rallied hard today and all achieved much more than the average levels. Tomorrow will be a SS day. Markets are at or close to average 3 day rally levels. So it could go both ways.

Friday August 20th, 2010

Today was a Sell day. Weak markets after last night's confirmation of a Hindenburg Omen. A third Omen today also however markets managed to get back above the BDL at the close.

Monday will be a SS day. Yes we have room to go up however markets could go either way if we open at the current levels.

Tuesday August 24th , 2010

Today was a Buy day and the low was made early but since 3 of 4 indexes were under TVGR all day we didn't get a convincing rally so far.

Tomorrow will be a Sell day. We should get a rally but the lack of conviction in today's start of a rally is not promising

Wednesday August 25th, 2010

Today was a Sell day. Markets tested the BD Lows and some even tested the Violation levels, before starting the rally.

Tomorrow will be a SS day. We are in the middle of the road on the 3 day rally so it could go either way.

Thursday August 26th, 2010

Today was a Textbook SS day. Markets tried to test the highs of the Sell day and failed to get much higher and therefore the decline started.

Tomorrow will be a Buy Day. Most of the decline is in so if the bulls want to save face they could start a rally earlier rather than later.

Friday August 27th, 2010

Today was a Buy day. Markets declined to reach the objectives, then the rally began.

Monday will be a Sell day. At this point the rally has reached the averages, I would therefore expect a confusing day.

Monday August 30th , 2010

Today was a Sell day. Markets rallied overnight to reach the max Penetration levels then pulled back to Normal TTT levels for the open. They then tried to test the Buy day highs and failed. TVGR was in effect and markets dropped all day.

Tomorrow will be a SS day. We are close to the Buy day lows and based on today's trend we could have a failed 3 day rally on the day session tomorrow.

Tuesday August 31st, 2010

Today was a SS day. Markets declined overnight and ES tested previous lows for a triple bottom. Then rallied again to create a Positive 3 day rally

Tomorrow will be a Buy day. Today having closed on the highs, momentum may take us higher before the decline starts.
