Monday December 2nd 2013

Today was a SS day. Markets tried to rally but couldn't get any traction, therefore the decline started

Tomorrow will be a Buy day. There is still room for the decline to continue

Tuesday December 3rd 2013

Today was a Buy day. As expected the decline continued and reach TTT levels before a rally could start.

Tomorrow will be a Sell day. There is plenty of room for the rally to continue.

Wednesday December 4th 2013

Today was a Sell day. Markets were confused big time and retested the BDL a few times

Tomorrow will be a SS day. If we open below the BDL in the morning we will have good odds of at least getting back to these levels. Once that achieved, a decline could start at anytime.

Friday December 6th 2013

Today was a Buy day. Well most of the decline was done yesterday and the rally started early

Monday will be a Sell day. Based on the close momentum should keep this rally going. However since most of the rally is in place it may be a confused day.

Monday December 9th 2013

Today was a Sell day. Markets didn't really do much but most rallied to or past their TTT Levels.

Tomorrow will be a SS day. Most markets are at their TTT levels, therefore the decline could start at any time.

Tuesday December 10th 2013

Today was a SS day. Markets retested their previous day's high and failed to go higher. The decline then started.

Tomorrow will be a Buy day. There is room for the decline to continue.

Wednesday December 11th 2013

Today was a Buy day. Markets really declined and passed all levels on the way.

Tomorrow will be a Sell day. Haing closed on the lows of the day, momentum may take markets lower before the rally can start.

Thursday December 12th 2013

Today was a Sell day. Some of the markets opened below the BDL and rallied back above just to close under again

Tomorrow will be a SS day. We should be starting to use the March Contract now. Markets are below the BDL and should try to rally back above.

Friday December 13th 2013

Today was a SS day. Officially this was a failed 3 day rally. However if we look at the low created 2 days ago using the current contract, we did manage to get back above that Low.

Monday will be a Buy day. There is still room for the decline to continue.

Monday December 16th 2013

Today was a Buy day. Today's decline was done during the overnight session and some managed to get a small decline for the day session.

Tomorrow will be a Sell day. The Rally is already in place, this may cause some confusion for tomorrow.

Tuesday December 17th 2013

Today was a Sell day. As mentioned last night, the rally was in place and today would be a confused day. Therefore the markets ran up and sown between their previous day highs and their TTT levels.

Tomorrow will be a SS day. The confusion could continue since we have room to rally but we have a 3 day rally in place.

Wednesday December 18th 2013

Today was a SS day. Markets were a bit confused but decided to rally hard at the end of the day.

Tomorrow will be a Buy day. Momentum may take markets higher before the decline starts.

Thursday January 2nd 2014

Today was a SS day. Markets gaped down and continued their decline.

Tomorrow will be a Buy day. There is room for the decline to continue before a rally starts.

Monday January 6th 2014

Today was a Sell day. Markets retested Friday's highs and failed and pulled back .

Tomorrow will be a SS day. Some markets are below the BDL and therefore have big odds of at least getting back above. Once that accomplished all bets are off as far as getting either a rally or a decline.

Tuesday January 7th 2014

Today was a SS day. Markets did decide to rally after all and closed on the highs of the day.

Tomorrow will be a Buy day. Momentum may take the markets higher before the decline can start.

Wednesday January 8th 2014

Today was a Buy day. Markets tried to decline and tried to rally. We ended up with a small decline and some start of a rally.

Tomorrow will be a Sell day. Confusion may continue tomorrow with this rally

Thursday January 9th 2014

Today was a Sell day. As expected this was a confused day with testing of yesterday's both the highs and the lows.

Tomorrow will be a SS day. There is room for the rally to continue but again it could be confused.

Monday January 13th 2014

Today was a Buy day. As expected we did get a decline and a good one at that.

Tomorrow will be a Sell day. A small rally started but we may retest the lows before it continues.

Wednesday January 15th 2014

Today was a SS day. Markets kept rallying and even surpassed their Penetration levels

Tomorrow will be a Buy day. Having closed near the highs of the day, momentum may take the markets higher before a decline starts.

Thursday January 16th 2014

Today was a Buy day. Markets decline modestly and YM did reach its target.

Tomorrow will be a Sell day. Momentum, although lite, may take markets lower before a rally start.

Friday January 17th 2014

Today was a Sell day. Momentum did take the markets lower and the rally is very weak

Monday will be a SS day. NQ is below the BDL and therefore the others may drag it up to at least that level

Tuesday January 21st 2014

Today was a Buy day. When markets opened this morning we were above the previous day high and we knew that we had high odds of getting a decline.

Tomorrow will be a Sell day. Part of the rally is in place which may make for a confused day.

Thursday January 23rd 2014

Today was a SS day. Markets started their decline overnight and continued part of the day. YM was the only one to fail having a 3 day rally for the day session

Tomorrow will be a Buy day. Most of the decline is in place. Therefore the rally could start at any time.

Friday January 24th 2014

Today was a Buy day. Markets did continue their decline and past all TTT levels.

Monday will be a Sell day. Having closed on the lows of the day, momentum may take markets lower before a rally starts.

Monday January 27th 2014

Today was a Sell day. Momentum did take the markets lower before a rally started. However the rally was short lived and the lows were retested a few times.

Tomorrow will be a SS day. We do have good odds of at least getting back above the BDL.

Tuesday January 28th 2014

Today was a SS day. ES and YM tried to drag the other 2 as they made it above the BDL, however NQ missed it by a lot and TF by just a few ticks.

Tomorrow will be a Buy day. We should be looking for some decline.

Wednesday January 29th 2014

Today was a Buy day. Markets declined and reached their TTT levels. So far the rally is not convincing.

Tomorrow will be a Sell day. Momentum may take markets lower before a rally starts.

Thursday January 30th 2014

Today was a Sell day. Markets rallied and all surpassed their respective TTT levels.

Tomorrow will be a SS dy. We are close to TTT levels, therefore the decline could start at any time

Friday January 31st 2014

Today was a SS day. YM opened below the BDL this morning and we knew that we had high odds that we would at least get back above. The others rallied to drag YM above and they also reached their respective TTT levels.

Monday will be a Buy day. A small decline is in place and based on averages markets should decline further.

Monday February 3rd 2014

Today was a Buy day. Markets really put in a strong decline passing all TTT levels.

Tomorrow will be a Sell day. Momentum may take markets lower before a rally can start

Tuesday February 4th 2014

Today was a Sell day. Markets rallied and most reached their respective TTT levels before pulling back.

Tomorrow will be a SS day. there is room for the markets to continue rallying, however caution should be taken on a SS day to go long.

Wednesday February 5th 2014

Today was a SS day. Markets were confused today as they retested the BDL and started to rally again.

Tomorrow will be a Buy day. We should be looking for a decline.

Thursday February 6th 2014

Today was a Buy day. Markets produce a decline mainly in the overnight session and a very small one in the day session.

Tomorrow will be a Sell day. the rally is already in place which could make for a confusing day tomorrow.

Friday February 7th 2014

Today was a Sell day. markets were confused overnight but decided to rally hard during the day session and surpassing all TTT levels.

Monday will be a SS day. We have more than the average rally in place. Momentum may take the markets higher before a decline can start.

Thursday February 13th 2014

Today was a SS day. Markets had started their decline during the overnight session but reversed course and rallied the whole day session.

Tomorrow will be a Buy day. Momentum may take the markets higher before a decline starts.

Today was a Buy day. Markets decline but it was a less than average decline

Monday will be a Sell day. Being a shortened trading day, and nearly having the average rally in place, we may get a confused day.

Monday February 17th 2014

Today was a Sell day. Markets continued their rally and some even reached they targets.

Tomorrow will be a SS day. Markets are not far from their targets and therefore the decline could start at any time.

Thursday February 20th 2014

Today was a Sell day. Momentum did take the markets lower and then the rally started.

Tomorrow will be a SS day. There is still room for the rally to continue if they want to.

Monday February 24th 2014

Today was a Buy day. Markets retested Friday's lows and failed to go much lower. The rally then started.

Tomorrow will be a Sell day. There is room for the rally to continue, but that could be in a confused way.

Wednesday February 26th 2014

Today was a SS day. Markets retested yesterday's highs and failed to go higher. Therefore the decline started.

Tomorrow will be a Buy day. There is still room for the decline to continue.

Friday February 28th 2014

Today was a Sell day. Markets rallied to their penetration levels and the pulled back only to rally up again.

Monday will be a SS day. We are passed TTT levels, therefore the decline could start anytime.

Tuesday March 4th 2014

Today was a Buy day. We had a small decline during the overnight session, however with this huge gap at the open of the day session, TVGR did set in and the markets rallied hard all day.

Tomorrow will be a Sell day. Markets have rallied above their average levels which may make for a confused day.

Monday March 10th 2014

Today was a Sell day. Markets retested their BDL before starting some kind of rally.

Tomorrow will be a SS day. There is room for the 3 day rally to continue, but we will need to see more conviction than what we saw today.

Thursday March 13th 2014

Today was a Sell day. Today was a Sell day and a confused one at that, probably due to the rollover.

Tomorrow will be a SS day. We are below the BDL and should rally above that level tomorrow. We should be carefull as there could be confusion as to the BDL level from the old contract.

Tonight's figures are for the new contract.

Friday March 14th 2014

Today was a SS day. Markets failed to rally to the BDL which is rare.

Monday will be a Buy day. There is room for the decline to continue.

Monday March 24th 2014

Today was a SS day. Markets rallied back to their TTT levels in the hope to get NQ to the BDL, which it missed by 1 ticks. The decline then started.

Tomorrow will be a Buy day. There is a little room to continue the decline.

Wednesday March 26th 2014

Today was a Sell day. Markets retested their Previous Day High and reversed and have closed below the BDL

Tomorrow will be a SS day. We do have very high odds of at least rallying back up to the BDL.

Thursday March 27th 2014

Today was a SS day. Markets tried to get back above BDL, however only ES and YM made it. Once they did markets started their decline.

Tomorrow will be a Buy day. There is room for the decline to continue

Friday March 28th 2014

Today was a Buy day. The decline was smaller than expected, probably due to the failed 3 day rally of yesterday.

Monday will be a Sell day. There is room for the rally to continue.

Wednesday April 2nd 2014

Today was a Buy day. Market did look bullish as evidenced by the small decline.

Tomorrow will be a Sell day. There is plenty of room for the rally to continue.

Thursday April 3rd 2014

Today was a Sell day. Well so much for continuing the rally. ES retested the BDL and bounced back which stopped the other from going so far below the BDL

Tomorrow will be a SS day. Maybe the late day rally started in ES will continue and drag NQ and TF above the BDL.

Friday April 4th 2014

Today was a SS day. Markets rallied just enough to get everyone above the BDL, after which time the decline started.

Monday will be a Buy day. The average decline is in place and therefore the rally could start at anytime.

Monday April 7th 2014

Today was a Buy day. The decline was strong and continued all day.

Tomorrow will be a Sell day. Momentum may take the markets lower before a rally starts.

Tuesday April 8th 2014

Today was a Sell day. Markets retested the BDL and then the rally started.

Tomorrow will be a SS day. There is some room for the rally to continue, however the decline could also start at any time.

Thursday April 10th 2014

Today was a Buy day. Markets retested their previous day's high and failed. The decline then started.

Tomorrow will be a Sell day. Momentum may take markets lower before the rally can start.

Friday April 11th 2014

Today was a Sell day. Markets were below the BDL at the open of the day session. We knew we had very high odds of at least getting back above these lows and we did.

Monday will be a SS day. Markets have come back down below the BDL and based on averages they should try to get back above these lows.

Monday April 14th 2014

Today was a SS day. Markets made it back to the BDL and declined again only to rally back to the BDL

Tomorrow will be a Buy day. The end of day momentum may take the markets higher before a decline starts.

Tuesday April 15th 2014

Today was a Buy day. Markets did produce a nice decline and then the rally started.

Tomorrow will be a Sell day. Markets are above their TTT levels which could make for a confusing day.

Wednesday April 16th 2014

Today was a Sell day. Markets rallied to their Penetration levels and then wobbled all day.

Tomorrow will be a SS day. Again markets are way above their average 3 day rally, therefore the decline could start at any time.

Wednesday April 23rd 2014

Today was a SS day. Markets drifted down today.

Tomorrow will be a Buy day. There is room for the decline to continue. However based on the price action of the last 2 days we may get a smaller than average decline.

Thursday April 24th 2014

Today was a Buy day. TF and NQ reached their TTT levels while ES and YM retested yesterday's lows and rallied from there.

Tomorrow will be a Sell day. There is still lots of room for the rally to continue.

Friday April 25th 2014

Today was a Sell day. Markets steadily declined all day and tested penetration levels.

Monday will be a SS day. Based on averages we have very high odds of at least rallying back to the BDL.

Tuesday April 29th 2014

Today was a Buy day. The decline was modest except for NQ and TF which nearly reached their TTT levels.

Tomorrow will be a Sell day. Part of the rally is in place which may make for a confused day.

Wednesday April 30th 2014

Today was a Sell day. Some markets opened below the BDL and the rally took every one up past the BDL.

Tomorrow will be a SS day. There is room for the rally to continue and momentum should take markets higher before a decline starts
