Futures and forex trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing ones' financial security or life style. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. for example, the ability to with stand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.

Today was a SS day. RTY declined to early so markets had to rally to get RTY above its BDL, then the real decline started.

Tomorrow will be a Buy day. There is plenty of room for the decline to continue.

Today was a Buy day. Each market reached one of its levels. ES upper deviation of Violation, RTY TTT MA, NQ TTTv and YM retested its previous day low. Then the rally started.

Tomorrow will be a Sell day. ES has reached the recap level, therefore we could be looking for a confused day.

Tuesday July 31st 2018

Today was a Sell day. Markets rallied and some in a confused way by retesting yesterday's low.

Tomorrow will be a SS day. Markets are close to or at their target for the 3 day rally. Therefore the decline could start at any time. Having said that, having closed on the highs of the day, momentum may take markets higher before the real decline starts.

Wednesday August 1st 2018

Today was a SS day. Markets declined and then rallied again to test yesterday's high only to decline again and rally again. Confused day but considering it is the 1st of the month and FOMC day what else were we to expect.

Tomorrow will be a Buy day. There is room for the decline to continue, but that also could be confused.

Friday August 24th 2018

Today was a Sell day. Although I said it would be a confused Day, markets rallied from the start and surpassed yesterday's high to reach some TTT level.

Monday will be a SS day. Momentum should help take markets higher to reach their TTT levels.

Today was a Buy day. Momentum did take markets higher before a mild confused decline started.

Tomorrow will be a Sell day. There is a good possibility that the confusion could continue.

Today was a Sell day. Oh well, there was no confusion and markets rallied hard and reached their Penetration Levels.

Tomorrow will be a SS day. Most markets are close to their 3 day rally targets. Based on today's momentum, they should at least reach these targets.

Thursday September 6th 2018

Today was a Sell day. Markets were really confused as some went below yesterday's low but only NQ didn't make it back above by the close.

Tomorrow will be a SS day. Markets should rally a bit, at least until NQ gets back above its BDL.

Today was a SS day. Markets were confused as they tried to get NQ above its BDL. NQ is the only one that failed.

Monday will be a Buy day. We should be looking for a decline.

Thursday September 13th 2018

Today was a Buy day. It was a bit confusing due to the rollover. Some did produce a decline based on the old contract.

Tomorrow will be a Sell day. We are now using the new contract and there is some little room for the rally to continue.

Wednesday September 19th 2018

Today was a Sell day. As expected the rally was pretty much done. They tried to retest yesterday's high a few time, therefore showing the confusion for today.

Tomorrow will be a SS day. Again the 3 day rally seems done so we will either get more confusion or the decline will start.

Monday September 24th 2018

Today was a Sell day. Markets tried to rally but it was very confused and ES failed to get above it BDL for both Day and Globex sessions.

Tomorrow will be a SS day. Some instruments closed below their BDL and based on averages we have very good odds of at least getting back above these levels.

Tuesday September 25th 2018

Today was a SS day. Markets tried to get back to their BDL but not all made it. The decline was confused as only 2 out of 4 declined and 2 rallied. Very confusing.

Tomorrow will be a Buy day. Will there be more confusion? That is the question.

Today was a Sell day. Markets were confused and retested yesterday's lows before rallying again. However RTY closed below yesterday's low.

Tomorrow will be a SS day. RTY needs to get back above its BDL so maybe the rally that the others are having will drag RTY out of the hole.

Thursday October 11th 2018

Today was a SS day. This was a very strong failure of the 3 day cycle. This could be an indication of a possible bear market in the make.

Tomorrow will be a Buy day. The decline is more than in place. Therefore a rally should start. Having said that, there is 2 possible scenario. 1st a further decline continue trying to put the bears in control. 2nd a strong rally to the previous BDL which would negate this last failure.

Today was a Sell Day. Markets were confused with their rally and declines all day.

Tomorrow will be a SS day. There is room for the rally to continue but confusion may still reign.

Thursday October 18th 2018

Today was a Sell day. Markets declined most of the day and then recuperated some. All markets managed to produce a positive Sell day, but closed under yesterday's low.

Tomorrow will be a SS Day. We should be looking for some kind of rally as markets should try to get back above their BDL.

Today was a Buy day. I guess the elections had some effect on the markets at we only got a decline during the Globex session.

Tomorrow will be a Sell day. We are above our targets, therefore we could be in for a confused day

Friday November 16th 2018

Today was a Sell day. As expected markets were confused but rally did reach Penetration levels.

Monday will be a SS day. The rally is more than in place and since we closed near the highs of the day, momentum may take markets higher before the decline starts.

Today was a Buy day. Markets were confused with some retesting yesterday's lows and then rallying only to come back to retest again.

Monday will be a Sell day. Confusion will probably continue.

Tuesday November 27th 2018

Today was a SS day. Most markets rallied and surpassed their TTT levels. RTY was the exception.

Tomorrow will be a Buy day. We should be looking for a decline, however momentum may take markets higher before the decline starts.

Today was a Buy day. Markets gapped up and only RTY managed to closed that gap. That is a bullish sign for the market unless they decline more tomorrow to close that gap and then rally.

Tomorrow will be a Sell day. We need to see what they will do with gap or if the rally will continue.

Today was a Sell day. So much for a bullish markets, that got negated in a hurry and then some.

Tomorrow will be a SS day. Based on averages, markets should get back to at least yesterday's low. Having said that this is quite a hill to climb and since we did close on the lows of the day, momentum could take markets lower before a rally starts.

Wednesday December 5th 2018

Today was a SS day. Markets were supposed to rally but they ended up closed due to Bush's Funeral. Therefore the day session is messed up and I had to improvise numbers since markets were open everywhere else in the world and even in US globex

Tomorrow will be a Buy day. Not sure what the repercussion of today will be tomorrow as this is the first time something like this closure happened since I have been doing this.(Over 10 Years)

Today was a Buy day. Markets decline further and surpassed all levels before a rally started.

Tomorrow will be a Sell day. As markets are doing crazy moves, the rally is in place, so we could be in for a confused day.

Friday December 7th 2018

Today was a Sell day. Markets were confused as expected and closed near their BDL.

Monday will be a SS day. Markets are still confused as to which way to go. We should be looking for some kind of rally on Monday. However having said that the decline could start at any time.

Tuesday December 11th 2018

Today was a Buy day. As expected markets rallied higher and once they reached their Penetration levels, the decline started. The decline then reached TTT levels and a confused rally started.

Tomorrow will be a Sell day. The confusion will probably continue.

Monday December 17th 2018

Today was a Sell day. Markets did manage to produce a rally during the Globex and day session before another decline .

Tomorrow will be a SS day. Based on averages, markets should try to get back above their BDL. A failure would point to a bear market.

Wednesday December 19th 2018

Today was a Buy day. However it looked more like a Sell day as the FEDs reversed the rally that had started overnight. Having said that, markets restarted a rally when they reached their Violation levels.

Tomorrow will be a Sell day. The rally that started late in the day, should be able to continue.

Friday December 21st 2018

Today was a SS day. Markets had to get back their BDB even for the day session. They all made it except for RTY. Then the decline started.

Monday will be a Buy day. The decline is more than in place; therefore the rally could start at any time. However we are looking at a half day of trading, so it is hard to predict the outcome.

Have a great weekend and a great Holiday Season.

Monday December 24th 2018

Today was a Buy day. Markets really declined and surpassed all possible levels even the Maximum Standard Deviation Levels.

Wednesday will be a Sell day. Momentum may take markets lower before the rally starts.

For those of you who celebrate Christmas please have a Merry Christmas.

Wednesday December 26th 2018

Today was a Sell day. As expected momentum did take markets lower before the rally started. This rally surpassed all possible levels, even the Standard Deviation Levels.

Tomorrow will be a SS day. Although we are way above the 3 day rally numbers, momentum may take markets higher before the decline starts.

Friday December 28th 2018

Today was a Buy day. Dow and NQ produced a decent decline while the other 2 had somewhat of a confused day.

Monday will be a Sell day. Yearend window dressing often makes for a confused day, and being a Sell day that is the perfect day for it.

Have a great weekend and all the best for 2019
