Futures and forex trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing ones' financial security or life style. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. for example, the ability to with stand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.

Thursday January 2nd 2020

Today was a SS day. ES rallied to its Standard Deviation Penetration highs, then a decline started. Then WOW the power of the previous day high, a new rally started.

Tomorrow will be a Buy day. Momentum may take markets higher before the real decline starts.

Thursday January 9th 2020

Today was a Sell day. Markets continued their rally but in a more confused way.

Tomorrow will be a SS day. Momentum may take markets higher. Having said that, since we are way above the average targets, the decline could start at any time.

Friday January 10th 2020

Today was a SS day. As expected momentum did take markets higher and when they reached their Penetration levels, the decline started.

Monday will be a Buy day. Although the decline is mostly in place, momentum may take markets lower before the rally starts.

Monday January 13th 2020

Today was a Buy day. Markets were already at targets therefore the rally started at the open.

Tomorrow will be a Sell day. Markets are again at their targets, which could make for a confused day. Having said that momentum may take markets higher before the confusion starts.

Tuesday January 14th 2020

Today was a Sell day. As expected markets rallied a little bit more and then when ES reached TTT MA the confusion started.

Tomorrow will be a SS day. Markets are close to their targets, therefore the decline could start at any time.

Friday January 17th 2020

Today was a Sell day. As expected momentum did take markets higher and when ES reached its Penetration levels, the confusion started.

Monday will be a SS day. Markets are at targets. Therefore the decline could start at any time.

Have a great weekend.

Wednesday January 22nd 2020

Today was a Sell day. Markets rallied to start and once ES reached its Penetration level, the confusion started.

Tomorrow will be a SS day. As long as markets open above yesterday's low, the current decline could continue. If not we could be in for more confusion.

Thursday January 23rd 2020

Today was a SS day. Two of the four instruments opened below their BDL for the day session. Therefore markets had to rally in order for these two to produce a Positive 3 day rally. We had 90%+ odds of that happening and it did.

Tomorrow will be a Buy day. Having closed near the highs of the day, momentum may take markets higher before the decline starts.

Tuesday January 28th 2020

Today was a SS day. All markets except YM managed to get back above their BDL. YM only missed by 16 points.

Tomorrow will be a Buy day. Having closed near the highs of the day, momentum may take markets higher before the decline starts. If YM gets their 16 points it would negate their 3 day failure.

Wednesday January 29th 2020

Today was a Buy day. As expected momentum did take markets higher and once Penetration levels reached, the decline started. YM did negate its Failure of yesterday.

Tomorrow will be a Sell day. Again momentum may take markets lower before the rally starts.

Thursday January 30th 2020

Today was a Sell day. As mentioned last night, momentum did take markets lower and once they tested their Violation levels a few times, the rally started.

Tomorrow will be a SS day. ES is at its target level, however momentum may take markets higher before the decline starts.

Friday January 31st 2020

Today was a SS day. Markets tested yesterday's high and didn't manage to get much higher. Then the decline started, and surpassed all levels before reversing.

Monday will be a Buy day. The decline is in place, therefore the rally could start at any time.

Have a great weekend

Monday February 3rd 2020

Today was a Buy day. As expected, since the decline was already in place, the rally started right from the open on Sunday night.

Tomorrow will be a Sell day. Again the rally is in place, we could therefore be in for some confusion.

Thursday February 6th 2020

Today was a Buy day. As expected in last night's report, momentum did take markets higher before the decline started. The TTT Range indicator was a great tool to help us predict today's high and the support level once the high was reached.

Tomorrow will be a Sell day. A good part of the rally is in place. Therefore we could be in for a confusing day.

Today was a Sell day. Markets continued their rally.

Tomorrow will be a SS day. The rally is in place, therefore the decline could start at any time. Having said that momentum may take markets higher before the decline starts.

Thursday February 20th 2020

Today was a Sell day. As expected we did get confusion, however it was much more exaggerated than anticipated.

Tomorrow will be a SS day. Some of the markets are below their BDL. Therefore we should be looking for a rally to at least that level, after which anything can happen.

Friday February 21st 2020

Today was a SS day. All but RTY had a FAILED 3 day rally. The whole week felt like we were out of cycle, however that sometimes happens when we get a shorten day holiday.

Monday will be a Buy day. The decline is in place, therefore the rally could start at any time.

Have a great weekend.

Tuesday February 25th 2020

Today was a Sell day. Markets all produced a rally in both the 24hrs and day session, as they reached their Sell day targets and even their 3 day rally targets. However they didn't manage to hold to these gains and crashed passed all Violation levels.

Tomorrow will be a SS day. Markets need to get back above their BDL to produce a positive 3 day cycle. If they don't, that will be the second failure in a row. That is a bearish sign.

Wednesday February 26th 2020

Today was a SS day. Markets declined again and then tried to rally. They failed to get back above their BDL and therefore failed to produce a Positive 3 day rally. That is bearish unless they manage to negate that failure tomorrow with a big rally.

Tomorrow will be a Buy day. The decline is in place. Therefore the rally could start at any time, if they want.

Monday March 2nd 2020

Today was a SS day. Markets declined further with a gap at the open last night. However a confused rally started very soon after the open and recovered the last 2 trading day losses.

Tomorrow will be a Buy day. We should be looking for some kind of decline, before a rally starts.

Tuesday March 3rd 2020

Today was a Buy day. And a confused Buy day it was. Markets declined to their MA levels only to rally past their future 3 Day rally levels. Then a new confused decline started.

Tomorrow will be a Sell day. At this point, is the late day rally, the real one, or will the confusion continue.

Monday March 9th 2020

Today was a Sell day. Markets gapped down at the open last night and never looked back. TVGR was in effect. Only the day session missed to produce a rally.

Tomorrow will be a SS day. It is a long way to get back to their BDL. Markets could go either way, but should try to get back to that target.

Tuesday March 10th 2020

Today was a SS day. 3 out of 4 failed to reached their BDL. Only NQ made it and the other 3 did give is a college try twice.

Tomorrow will be a Buy day. Markets may try to negate that failure with the end of day momentum. We could also be looking for a small decline.

I must admit it is not easy to read this crazy market.

Wednesday March 11th 2020

Today was a Buy day. Markets tried to retest yesterday's low, then some kind of rally started.

Tomorrow will be a Sell day. With this kind of crazy markets, we need to pay more attention to the Recap MA numbers. However the markets are still very volatile.

Thursday March 12th 2020

Today was a Sell day. Markets did managed to produce a small rally in the Globex session. But the rally failed and a strong decline started.

Tomorrow will be a SS day. Big hill to climb and most likely we will get another 3 day rally failure.

Friday March 13th 2020

Today was a SS day. Markets did try hard to get back to their BDL but only NQ and ES made it.

Monday will be a Buy day. Markets may try to negate this failure as they are so close. However since the Bear markets is confirmed, The decline could start at any moment.

Have a great weekend

Monday March 16th 2020

Today was a Buy day. Markets declined and declined hard.

Tomorrow will be a Sell day. Looking more to the Recap MA page now since the last manty cycles have been crazy, we should soon get a better picture that looking at 12 years of history provide in the Recap page. Based on the recap MA page we have reached the targets for tomorrow, however Momentum should take markets higher. That said if you like Fibonacci today's decline took ES to 38.2% correction of the rally that started March 2008 till last month's high. Let see what will happen.

Friday March 20th 2020

Today was a Sell day. As expected the rally was confused with markets Penetrating yesterday's high, then declining with some Violating yesterday's low.

Monday will be a SS day. Based on averages two of the instruments need to make it back above yesterday's low. Then the decline could start at any time.

Have a great weekend.

Monday March 23rd 2020

Today was a SS day. Markets opened lower but rallied back to get at least above their BDL.

Tomorrow will be a Buy day. Markets are below their decline targets, therefore the rally could start at any time. Having said that, since we are in a bear market, the decline could continue.

Friday March 27th 2020

Today was a Buy day. Markets declined and reached TTT MA levels then rallied back to TTT levels only to decline back to MA levels again.

Monday will be a Sell day. Late day momentum may take markets lower before the real rally starts.

Have a great weekend.

Monday March 30th 2020

Today was a Sell day. As expected markets continued their declined and when they reached their MA Violation levels, the rally started.

Tomorrow will be a SS day. MA targets are in place. Therefore the decline could start at any time. Having said that, momentum may take markets higher before that decline starts.

PS. I am using the MA page numbers since it uses the last 20 cycles average. In this crazy time that seems better targets.

Tuesday March 31st 2020

Today was a SS day. Momentum did take markets higher to their Violation levels, before the decline started.

Tomorrow will be a Buy day. Markets are already below their MA levels for tomorrow. Therefore the rally could start at any time.

Thursday April 2nd 2020

Today was a Sell day. Markets were confused from the start rallying then retesting their BDL, only to rally again but in a confused way.

Tomorrow will be a SS day. MA targets are nearly in place, therefore more confusion could be possible.

Monday April 6th 2020

Today was a Buy day. Markets rallied from the open last night and never looked back. Only the globex session produced a decline. TVGD did set in for the day session, therefore preventing a decline.

Tomorrow will be a Sell day. The rally has surpassed TTT MA level. Therefore we could be in for a confused day.

Thursday April 9th 2020

Today was a Buy day. Markets had a confused decline, then a rally started.

Monday will be a Sell day. The rally is mostly in place, therefore we could be in for more confusion.

Have a great stay at home weekend.

Thursday April 16th 2020

Today was a Sell day. Markets tested their Yesterday's low a few times and then the real rally started.

Tomorrow will be a SS day. Markets haven't reached their TTT MA level yet, therefore the rally could continue. Having said that if markets open above their BDL tomorrow for the day session, the decline could start at any time.

Friday April 17th 2020

Today was a SS day. Markets gaped up at the open of the globex session but later declined o close the gap only to rally again.

Monday will be a Buy day. Momentum of the late day rally may take markets higher before the decline starts.

Have a great weekend.

Wednesday April 22nd 2020

Today was a SS day. Markets did have great odds of getting back above their BDL and they did. Then it looks like a new decline has started.

Tomorrow will be a Buy day. There is room for the decline to continue.

Monday May 4th 2020

Today was a Sell day. Markets opened last night below their BDL. At that point we knew we had very good odds of getting back above these lows. YM was slow to get there but managed it during the day session.

Tomorrow will be a SS day. There is room for today's rally to continue.

Thursday May 7th 2020

Today was a Sell day. Momentum took markets lower at the start, then a rally started and took a rest when Penetration levels were reached.

Tomorrow will be a SS day. Based on the last 3 months of data, the rally could continue. Having said that since it is a SS day the decline could also start at any time.

Friday May 8th 2020

Today was a SS day. Markets continued their rally until the close and reached their TTT MA Penetration levels.

Monday will be a Buy day. Momentum may take markets higher before the decline starts.

Have a great weekend.

Monday May 11th 2020

Today was a Buy day. As expected, momentum took markets higher to reached their Penetration levels before starting their decline. Then once the day session opened with a gap down, at Friday's day low, TVGR took over when the rally started.

Tomorrow will be a Sell day. The rally should continue but in a confused manner.

Tuesday May 12th 2020

Today was a Sell day. Markets did manage to produce a rally, however a strong decline started after the day session open.

Tomorrow will be a SS day. Based on averages, we have good odds that markets should try to get back above their BDL.

Wednesday May 13th 2020

Today was a SS day. Markets tried to get back above their BDL but all failed except NQ that even got there during the day session.

Tomorrow will be a Buy day. We should be looking for a rally however the decline may not be finished

Friday May 15th 2020

Today was a Sell day. As expected, the rally was mostly in place and once ES reached it's Penetration level, the confusion started.

Monday will be a SS day. There is room for the last part of the day rally to continue based on the RecapMA numbers. However as long as we open above the BDL, anything can happen.

Have a great weekend.

Monday May 18th 2020

Today was a SS day. Markets rallied all night and when the day session opened with such a gap, TVGR took over. The rally continued all day and slowed down when most markets reached their Standard deviation Penetration levels.

Tomorrow will be a Buy day. We should be looking for some kind of decline.

Tuesday May 19th 2020

Today was a Buy Day. All 4 instruments declined and reached their TTT level during the overnight session then started to rally to reach their Penetration level. Then declined again to retest that level and rallied again. Once NQ retested its high for the day then real decline started and all closed on their low for the day.

Tomorrow will be a Sell day. Momentum may take markets lower before the rally starts.

Wednesday May 20th 2020

Today was a Sell day. Momentum did take markets lower before the rally started. Then when ES reached its previous day high the rally stopped and confusion started.

Tomorrow will be a SS day. Late day momentum may take markets higher before the decline start. I must mention that TTT MA level still has room to go higher.

Monday May 25th 2020

Today was a Sell day. Although it was a Holiday, markets did manage to reach some Penetration levels, either average or Standard Deviation levels.

Tomorrow will be a SS day. Markets are stuck in between TTT and TTT MA levels. Therefore there is room for the rally to continue. Having said that, the decline could start at any time.

Today was a SS day. Markets all rallied to some Penetration levels before the decline started.

Tomorrow will be a Buy day. Markets are at their TTT levels but still have room to go if they want to reach their TTT MA levels. Having said that, since some kind of decline is in place the rally could start at any time.

Wednesday May 27th 2020

Today was a Buy Day. Markets declined and once ES reached its TTTv level, the rally started.

Tomorrow will be a Sell day. Markets are above their TTT levels but there is room to reach their TTT MA levels. Momentum may take markets higher before the confusion starts.

Friday May 29th 2020

Today was a SS day. Markets performed perfectly at the start but then month end window dressing started and confused the whole day.

Monday will be a Buy day. Momentum may take markets higher before the decline starts.

Have a great weekend

Monday June 1st 2020

Today was a Buy day. BDL was mad at the open of the Globex session then markets had resistance with their previous day high which cause confusion for the rest of the day.

Tomorrow will be a Sell day. We could be looking for more confusion.

Tuesday June 2nd 2020

Today was a Sell day. Markets were confused, rallied at first then declined and found support at TTT level and then rallied again.

Tomorrow will be a SS day. Momentum may take markets higher before the decline starts. We are in between the 2 targets therefore anything goes.

Thursday June 4th 2020

Today was a Buy day. It was a bit confusing. However when NQ retested its overnight low a rally started but once it reached its TTT Penetration Standard Deviation Low, the real decline started and reached its TTT StdDev Violation low. Then a new rally started.

Tomorrow will be a Sell day. Maybe more confusion in the cards as ES and NQ have reached their TTT levels, however based on the latest averages, they could easily go higher.

Friday June 5th 2020

Today was a Sell day. Markets rallied all day until they reached their TTT MA level.

Monday will be a SS day. The late day decline could continue however the TTT MA target still has room to go higher.

Have a great weekend.

Wednesday June 10th 2020

Today was a Sell day. As expected we had a confused day with NQ making new highs while the others just went up and down.

Tomorrow will be a SS day. Some closed below their BDL, therefore we have good odds that they will rally above these levels.

Thursday June 18th 2020

Today was a Sell day. Markets were confused and fought with their BDL all day, NQ and ES won but YM an RTY missed to close above by a little.

Tomorrow will be a SS day. Based on averages, markets should all get above their BDL before the close tomorrow. Once that is achieved, markets could go in any direction.

Friday June 19th 2020

Today was a SS day. Markets rallied to some Penetration level, then the decline started.

Monday will be a Buy day. Markets have surpassed their average decline levels. However having closed on the lows of the day, Momentum may take markets lower before the rally starts.

Have a great weekend.

Monday June 22nd 2020

Today was a Buy day. Markets open with a gap down last night at some Violation level. The rally then started and kept going all day.

Tomorrow will be a Sell day. Momentum may take markets higher, however since we are at target levels we could be in for some confusion.

Tuesday June 23rd 2020

Today was a Sell day. As expected we did get confusion. Last night ES dropped suddenly and bounced right back from its TTT MA Std Dev Low to then reach nearly its MA Penetration level.

Tomorrow will be a SS day. Based on today's action we could be in for more confusion.
