Futures and forex trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing ones' financial security or life style. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. for example, the ability to stand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.

Wednesday January 3rd 2024

Today was a Sell day. Markets declined and even closed below their BDL.

Tomorrow will be a SS day. Based on averages, markets should at least rally to their BDL. After that anything goes.

Thursday January 4th 2024

Today was a SS day. Markets tried to get back above their BDL. Only YM and ES made it, as once ES made it, they reversed, then the decline started.

Tomorrow will be a Buy day. There is little room for the decline to continue before the rally starts.

Tuesday February 13th 2024

Today was a Buy day. Markets declined and surpassed all possible levels, then a late day rally (correction ?) started.

Tomorrow will be a Sell day. There is room for the rally to continue, however we could look for some confusion.

Thursday March 21st 2024

Today was a Buy day. Markets did produce a very small decline at the start of the Overnight session but failed for the day session.

Tomorrow will be a Sell day. Maybe the decline in the late day may continue to negate the failed Buy day decline before the real rally starts.

Monday March 25th 2024

Today was a SS day. Most markets made a positive 3 day rally but only 2 did it for the day session.

Tomorrow will be a Buy day. There is room for the decline to continue, unless they want to rally in order to negate the failed 3 day rally.

Wednesday April 3rd 2024

Today was a SS day. Markets tried and failed to reach their BDL. Except NQ. Then the decline started but then a late day rally tried again.

Tomorrow will be a Buy day. There is room for the decline to continue, however the late day rally may continue and try to negate the failed 3 day rally.

Thursday April 4th 2024

Today was Buy day. As expected, markets rallied above their Previous BDL in order to negate the failure of the 3 day rally. Then the decline started.

Tomorrow will be a Sell day. Momentum may take markets lower before the rally starts.

Tuesday May 14th 2024

Today was a Sell day. Markets were confused to start but finished with a rally.

Tomorrow will be a SS day. There is room for the rally to continue, however if we open above the BDL for the day session, the decline could start at any time.

Today was a Sell day. YM retested its BDL most of the day, but once the day session started, the rally started for all instruments.

Tomorrow will be a SS day. There is room for the rally to continue, however if markets open for the day session above their BDL, then the decline could start at any time.

Friday May 31st 2024

Today was a SS day. Markets rallied to get back above their BDL and all but NQ made it. Then the decline started, only to rally again trying to get above the finish line but again failed.

Monday will be a Buy day. The late day momentum may rally in order try to negate the NQ failure. Then we should expect a Decline.

Wednesday June 26th 2024

Today was a SS day. All markets managed to produce a Positive 3 day rally, even for the day session. However it was a confused day.

Tomorrow will be a Buy day. I believe we should still be looking for some kind of decline before the rally starts.
