Futures and forex trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing ones' financial security or life style. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. for example, the ability to stand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.

Today was a Buy day. As expected in last night's comments, markets continued their rally.

Tomorrow will be a Sell day. Markets have already surpassed their target for tomorrow, therefore we could be in for a confused day.

Monday August 5th 2024

Today was a Buy day. Markets declined and surpassed all levels.

Tomorrow will be a Sell day. Due to today's crazy day; markets are already above their targets for tomorrow. I really can't predict tomorrow as it reminds me of 2008.

Tuesday August 6th 2024

Today was a Sell day. Markets rallied to their TTT MA target, and some made it to yesterday's high, then a new decline started. Confusion!

Tomorrow will be a SS day. The confusion could continue, however if markets open above their BDL, the decline could start at any time.

Tuesday September 17th 2024

Thursday October 3rd 2024

Today was a Sell day. ES and others retested their BDL twice and failed, then tried to rally.

Tomorrow will be a SS day. Today's late day rally should continue, however if markets open above their BDL tomorrow morning, then anything goes.

Friday October 11th 2024

Today was a Sell day. Markets tried to retest their BDL and failed. Then the rally started and reach Penetration levels.

Monday will be a SS day. There is room for the rally to continue, however as long as markets open the day session above their BDL, then anything goes.

Today was a Sell day. Markets rallied past their PH levels, then the confusion started.

Tomorrow will be a SS day. There is room for the rally to continue, however the confusion may also do so.

Tuesday November 12th 2024

Today was a SS day. Markets had a confused decline, with some reaching their BDL and some reaching their Projected BDL, before rallying again.

Tomorrow will be a Buy day. There is room for the decline to continue, however momentum of the late day rally could continue.

Wednesday December 4th 2024

Today was a Buy day. ES and NQ failed to produce a decline for the day session. But all did for the 24-hour session.

Tomorrow will be a Sell day. A good part of the rally is in place, therefore we could be in for a confused session.
